Subject: West Lake Landfill: Hammer out scope of fate and transport modeling workplan for SSFS
When: Monday, September 30, 2013 1:00 PM-2:30 PM (GMT-05:00) Eastern Time (US & Canada).
Where: R7-RO1.2-D32-8/R7-RO

This meeting is for modelers, technical folks and decision-makers to hammer out the scope of the fate and transport work that the PRPs are to do to respond to the NRRB comment on F&T modeling. This will follow up on the discussions we had in our meeting on Tuesday September 24th, so review your notes from that meeting prior to this call.

The outcome of this call will be a concrete set of decisions on what we will model, how we will model it, and what questions we will answer with the model results.

Teleconference call-in number is [REDACTED]
